d - Disclosure limitations. The values are not reported in order to protect the information of individual businesses.

*Many employees work less than or more than 40 hours per week. The above wage estimates are calculated by dividing the 2nd Quarter 2008 payroll by the number of employees and 520 hours (13 weeks by 40 hours). Thus, the average wage estimates may not represent the actual wage received by the employee per hour.

**The Total Annual Payroll is calculated by multiplying the 2nd Quarter 2008 payroll by four (the number of quarters in a year).

***Wages for service workers may include tips.
